Retain the information long enough to make an effective decision. Stringent guidelines need to be drawn with sufficient regulatory controls in implementation.

M, Mayerhoff D. Autonomous patients are presumed to be able to make decisions. Covert medication is the practice of hiding medication in food or beverages so that it goes undetected by the person receiving the medication. This information tallies with reports in the rest of the UK and indeed generally within Western mental health systems.

No one else can give consent for an adult, someone over the age of 18 or 16 in some is all covert medication deontologically wrong?
